Fiat 500 - Fiat - 2016-03-01
A visual history of the FIAT 500, the ultimate lifestyle car that has remained a timeless classic and design legend. Considered to be one of the most popular models in automotive history, the FIAT 500 has become a legend over time. Its innovative features, the original and recognizable design of its bodywork, and its versatility have distinguished it as an automotive icon with enduring appeal. FIAT 500: The Design Book is an invitation to embark on a captivating journey through the main milestones of the 500 project: from the first series in the 1960s to the public presentation at the Geneva International Motor Show of the Trepìuno prototype in 2004, of the new 500 and 500C, the 500L through to the 500X. This visually rich and fascinating book explains not only the genesis and "design metamorphosis" of each model, but also their backgrounds, and explores the contributions of the designers who have helped to develop them with innovation and foresight.

Virtual Screening - Christoph Sotriffer - 2011-02-21
Drug discovery is all about finding small molecules that interact in a desired way with larger molecules, namely proteins and other macromolecules in the human body. If the three-dimensional structures of both the small and large molecule are known, their interaction can be tested by computer simulation with a reasonable degree of accuracy. Alternatively, if active ligands are already available, molecular similarity searches can be used to find new molecules. This virtual screening can even be applied to compounds that have yet to be synthesized, as opposed to "real" screening that requires cost- and labor-intensive laboratory testing with previously synthesized drug compounds. Unique in its focus on the end user, this is a real "how to" book that does not presuppose prior experience in virtual screening or a background in computational chemistry. It is both a desktop reference and practical guide to virtual screening applications in drug discovery, offering a comprehensive and up-to-date overview. Clearly divided into four major sections, the first provides a detailed description of the methods required for and applied in virtual screening, while the second discusses the most important challenges in order to improve the impact and success of this technique. The third and fourth, practical parts contain practical guidelines and several case studies covering the most important scenarios for new drug discovery, accompanied by general guidelines for the entire workflow of virtual screening studies. Throughout the text, medicinal chemists from academia, as well as from large and small pharmaceutical companies report on their experience and pass on priceless practical advice on how to make best use of these powerful methods.

Situating Global Resistance - Lara Montesinos Coleman - 2013-09-13
The book examines some of the ways in which contemporary forms of political dissent are situated within processes of global ordering. Grounded in analysis of concrete practices of discipline and dissent in specific contexts, it explores the ways in which resistance can be shaped by dominant ways of thinking, seeing or enacting politics and by the multiform relations of power at play in the making of global order. The contributions, written from a variety of disciplinary backgrounds, address themes such as the processes through which particular sorts of resisting subjects are produced; the politics of knowledge in which resisting practices are embedded; the ways in which visual technologies are deployed within and towards oppositional practices; and the politics of gender, race and class within spaces of contestation. The volume thus opens up space for critical reflection and inter-disciplinary dialogue on what it means to be a resisting subject and on the interplay between the power and

counter-power in global order. This book was published as a special issue of Globalizations.

Astrophysics for Physicists - Arnab Rai Choudhuri - 2010-03-11
Designed for teaching astrophysics to physics students at advanced undergraduate or beginning graduate level, this textbook also provides an overview of astrophysics for astrophysics graduate students, before they delve into more specialized volumes. Assuming background knowledge at the level of a physics major, the textbook develops astrophysics from the basics without requiring any previous study in astronomy or astrophysics. Physical concepts, mathematical derivations and observational data are combined in a balanced way to provide a unified treatment. Topics such as general relativity and plasma physics, which are not usually covered in physics courses but used extensively in astrophysics, are developed from first principles. While the emphasis is on developing the fundamentals thoroughly, recent important discoveries are highlighted at every stage.

Harriet Martineau Dreams of Dancing - Shelagh Stephenson - 2017-01-19
What you haven't realised is that I sew to aid my thought processes. Look - needle - stab - stitch - thought. Needle - stab - stitch - thought. So next time you see a woman demurely sewing a sampler, be very, very wary. God knows what she may be planning. Harriet Martineau (1802-1876) was a social theorist who is often credited as being the first female sociologist. In Harriet Martineau Dreams of Dancing, Shelagh Stephenson depicts the great writer in a period of convalescence, living as an invalid by the sea in Tynemouth. Shut off from her usual society, Harriet is visited by women of the locale; Impie, a recent widow who is using her new-found marital freedom to paint murals on the ceilings of her family home; Beulah, the daughter of a woman who'd been sold into slavery and escaped; and Jane, the housemaid, whose unfeted and unexpected gifts lift her out of domestic servitude and could help Harriet out of illness. Harriet Martineau is a play about female self-reliance in a time of patriarchal dominance. Written by Shelagh Stephenson, it premiered at Live Theatre, Newcastle, in winter 2016.

Fuel Systems for IC Engines - Institution of Mechanical Engineers - 2012-03-06

This book presents the papers from the latest conference in this successful series on fuel injection systems for internal combustion engines. It is vital for the automotive industry to continue to meet the demands of the modern environmental agenda. In order to excel, manufacturers must research and develop fuel systems that guarantee the best engine performance, ensuring minimal emissions and maximum profit. The papers from this unique conference focus on the latest technology for state-of-the-art system design, characterisation, measurement, and modelling, addressing all technological aspects of diesel and gasoline fuel injection systems. Topics range from fundamental fuel spray theory, component design, to effects on engine performance, fuel economy and emissions. Presents the papers from the IMechE conference on fuel injection systems for internal combustion engines Papers focus on the latest technology for state-of-the-art system design, characterisation, measurement and modelling; addressing all technological aspects of diesel and gasoline fuel injection systems Topics range from fundamental fuel spray theory and component design to effects on engine performance, fuel economy and emissions

Alfa Romeo TZ-TZ2 - Vitto Witting da Prato - 2017-02-01

Having left motor racing in the early 1950s - at least officially - Alfa Romeo returned to the sport once again at the start of the following decade due to the commitment and enthusiasm of Autodelta. This Alfa offshoot distinguished itself by preparing and racing about 30 of the manufacturer's different cars that really did make history. Among them, the Giulia TZ holds a place at the head of the crowd. It had a 1.5-litre, 113 hp engine from the Giulia SS, front and rear suspension of modern conception, disc brakes and an especially bold body shaped by Zagato on a modern tubular chassis. Those were the strong points of this car, which scored results of absolute prestige in its brief career at Sebring, in the Targa Florio, the 24 Hours of Le Mans and the Tour de France. Vito Witting da Prato, already the author of a meticulously written book on the Alfa Romeo SZ, covers the winning, human, technical and sporting factors of this unforgettable car in a monumental work. A book which, to the precise text and painstaking historical reconstruction, has been added illustrations of previously unpublished pictures and technical designs by Autodelta.

Chassis Handbook - Bernhard Heiing - 2010-11-09

In spite of all the assistance offered by electronic control systems, the latest generation of passenger car chassis still relies on conventional chassis elements. With a view towards driving dynamics, this book examines these conventional elements and their interaction with mechatronic systems. First, it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and list of references, this new edition already includes a number of improvements over the first edition.

OGT Reading - Andrea J. Lapey - 2005-01-01

OGT Exit Level Reading Workbook prepares students for the reading portion of the Ohio Graduation Test. Samples from similar tests provide plenty of practice and students learn to take multiple choice tests on their comprehension of what they read. Students learn to evaluate their own short answers to targeted questions, and learn from other students' responses to similar questions. This book is suitable for students in all states who need to take a reading exam for graduation or course completion.

Ferrari 250 GTO - Keith Bluemel - 2017-08-01

This magnificent book tells the story of a Ferrari 250 GTO with a particularly interesting and varied history. The car, chassis number 4153 GT, came fourth in its first outing at the Le Mans 24 Hours in 1963, and won the 10-day race-cum-rally Tour de France in 1964 with Lucien Bianchi and Georges Berger. It competed in almost every form of motorsport, including the Angolan Grand Prix, Africa in 1964, and endurance racing, hill-climbing and rallying in 1965, entered by the great Belgian team Ecurie Francorchamps. In 1966-69, it raced in Spain with owner Gerard Delgado and his friend Eugenio Baturone, a period that is described here for the first time. All this is covered in fascinating detail, supported by a fine collection of period photographs.

Flamingoland - Deborah McAndrew - 2008

In her Yorkshire council house, no-nonsense Mari is having a clear out before the 'Big Move' brought on by cancer. There's a lifetime of clutter to be sorted, the house to clean from top to bottom, and the squirrels in the loft to be dealt with before she can bow out. But, as well as memories of holidays in Mablethorpe and day trips to Flamingoland, there's a big box of family secrets to dust off and unwrap. Will Mari decide to let sleeping dogs lie? Or will she force them all to wake up and finally face the truth?
